» Work Preferences

Tools & Technologies: Seeking opportunities to work with modern tech stack (cloud, big data, ML frameworks) and experiment with new analytical methodologies.

Ideal Projects: Interested in projects combining data analysis, machine learning, and business impact. Preference for data-driven companies with modern infrastructure and access to significant datasets.

Business Impact: Want to contribute to projects where data analysis has direct impact on strategic decisions and measurable business results.

» Professional Summary

Senior data scientist with 12+ years of experience designing ML/AI solutions for complex business problems. Technical leadership on strategic data-driven initiatives and analytics team mentoring. Expertise in deep learning, NLP, and big data technologies.
